DETAILED ACTION

1. This application is a national stage entry (371) of PCT/FR03/00942, filed March 25, 2003.
2. Claims 21-27 are currently pending.

Unity of Invention

3. Claim 21, as currently amended, is directed to an invention that lacks unity with the invention originally claimed for the following reasons: it recites the special technical feature

“processing the first read signal by passing it through a first band-pass filter and a serially connected first amplifier; processing the second read signal by passing it through a second band-pass filter and a serially connected second amplifier; supplying an output of the first amplifier simultaneously to a first multiplier and a first delay circuit; supplying an output of the second amplifier simultaneously to a second amplifier and a second delay circuit; supplying an output of the first delay circuit to the second multiplier; supplying an output of the second delay circuit to the first multiplier; and supplying outputs of the first and second multipliers to a differential amplifier and low pass filtering an output of the differential amplifiers to generate a low-pass filter which constitutes the radial error signal S_r whose sign and amplitude represent a radial positioning error”,

which special technical feature is not required by the claims which were originally presented and already given action by the examiner.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21 & 22 are withdrawn from consideration as being directed to a nonelected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2627

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Allowable Subject Matter

5. Claims 23-27 are allowed over the prior art of record for the reasons indicated in the previous Office action.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
